

Empowering Health Through Medical Advances

ABOUT US

Founded in 1998 by Mr. Ranjit Advani, Nymak Pharma began by producing Sterilized Water for Injections BP in plastic ampoules. Initially serving the South Pacific, the company quickly built a reputation for quality, service, and care. As expertise grew, Nymak expanded to multiple islands across the South Pacific and entered the Honduran market in Central America. Anticipating changing needs, the company diversified its portfolio, adding a range of pharmaceuticals and medical disposables. A key milestone came in 2000 when Nymak entered the Nigerian market, boosting exports by 25%. This success inspired expansion into Africa, where the company saw its products improve lives. Today, Nymak Pharma operates in 24 countries, exporting over 200 containers in FY 2023-24. Recognized as a Government of India Certified Star Export House, the company's commitment to quality and compassionate care remains unwavering. With a strong infrastructure, including regulatory, lab, and QC teams, Nymak strives to deliver the highest product standards. Looking ahead, the company aims to make quality healthcare a fundamental right for all.
